#722 - Cerulean Blue

#126 - Yellow

#799 - International Orange

#175 - Shelf Grey

Colors shown are standard and can be selected at no additional cost. Custom colors can be quoted upon request.

Speedrack Storage Systems utilize the latest in powder coat technology, offering the most durable finish available. The Speedrack powder coating systems apply epoxy polyester hybrid with an average thickness of 1.8 to 2.2 mills. Products go through a 5 stage pre-wash system and are cured for 20 minutes in a gas fired convection oven.

\*Slight color variations are inherent in all "baked" finishes. For this reason, we retain the right for commercial color variation from the sample. Light source will affect appearance of color.
