

5 QUESTIONS TO ASK YOUR RACK DISTRIBUTOR BEFORE YOUR NEXT PROJECT

Planning a rack project? Ask your distributor:

- ▣ Which building code will apply to this project?
- ▣ Could the applicable building code change before we reach permitting?
- ▣ Could the applicable standard affect our rack design or configuration?
- ▣ Should we anticipate any impact on budget or timeline?
- ▣ Given our project plans, should we discuss designing to the latest standard?

Your distributor can help address potential design, budget, engineering, and permitting considerations before they impact your project.

Bring Your Distributor In Early If You're...

Building

New warehouse or DC

Expanding

Adding storage capacity

Reconfiguring

Changing an existing system

Planning Ahead

Considering future changes

Preparing to Permit

Moving toward engineering or permitting

Earlier conversations create more options.
